# Shashank Khatri

+918955261946 | twopiear@gmail.com | LinkedIn | GitHub

## Summary

Developer with experience building web applications and API-driven features, integrating external services, and working with real-world project workflows. Focused on writing clean, efficient, and reliable code, with a strong problem-solving mindset.

## Technical Skills

**Languages:** TypeScript, JavaScript, Python
**Web & Frameworks:** HTML, CSS, React, Redux, Node.js, Express.js, Mongoose
**APIs & Architecture:** RESTful APIs, third-party integrations, payment gateways & webhooks, modular architecture, pagination
**Databases:** MongoDB, SQL
**Auth:** JWT, sessions, refresh tokens, password hashing
**Tools & Deployment:** Git, GitHub, Postman, Render and Vercel for deployment

## Internship Experience

**System Polygon** **May 2025 – July 2025**
*Web Developer Intern* *On-site*

- Contributed to front-end fixes on a client website, including layout alignment and content updates to improve user experience
- Worked on internal learning projects, including a Data Visualization platform and a social media application, applying concepts in APIs, modular architecture, and database-driven development.
- Collaborated with the team in code discussions and reviews, gaining exposure to real-world development workflows.

## Projects

**DataViz — Analytics Dashboard** | *JavaScript, Chart.js, Express.js, Stripe, MongoDB*

GitHub: https://github.com/AntimonyBullets/DataViz | Live: https://datavisualisation-alpha-inky.vercel.app/

- Developed a Node.js (ESM) + Express REST backend with MongoDB/Mongoose and separate public/admin interfaces.
- Delivered Chart.js visualizations with filters, multi-country comparisons, and analytics from World Bank API + CSV ingestion pipeline.
- Implemented JWT authentication, role-based admin access, protected routes, and premium-feature access controls.
- Integrated Stripe Checkout with secure webhooks for premium upgrades and 30-day access lifecycle management.
- Established centralized error-handling utilities (ApiError/ApiResponse, async wrappers) and deployed backend on Vercel.

**Social Media — Backend Project** | *Node.js, Express.js, Cloudinary, JWT, Multer, MongoDB*

GitHub: https://github.com/AntimonyBullets/Social-Media-Platform

- Designed a Node.js + Express backend with JWT auth, refresh tokens, RBAC, and secure password hashing.
- Engineered core modules for videos, tweets, likes, comments, playlists, subscriptions, and channel statistics, with pagination and optimized queries.
- Configured Cloudinary + Multer for secure media uploads and storage for images and videos.
- Modeled MongoDB schemas and built aggregation pipelines for analytics such as watch history and engagement insights.
- Standardized API responses with centralized error handling (ApiError / ApiResponse) and validated workflows using Postman.

**BlogForge — Blog Platform** | *React, Redux, Appwrite, Tailwind CSS, React Router, TinyMCE*

Github: https://github.com/AntimonyBullets/BlogForge | Live: https://blog-forge-rho.vercel.app/

- Created a full-stack blog application using React, Vite, Redux Toolkit, and Appwrite (Auth, Database, Storage) with protected routes and persistent auth.
- Implemented rich-text post creation using TinyMCE + React Hook Form with slug generation and full CRUD functionality.
- Enabled image upload and media delivery through Appwrite Storage using public file-view rendering.
- Developed a reusable Tailwind-based UI with nested routing, guarded layouts, and modular form components.

## Education

**Bachelor of Technology in Computer Science and Engineering** **2023 – 2027**
*Jodhpur Institute of Engineering & Technology* *CGPA: 9.12*
