## Summary

Software Developer experienced in building web applications, developing APIs, and integrating third-party services, with a focus on problem-solving and writing clean, efficient, and maintainable code.

## Technical Skills

**Languages:** TypeScript, JavaScript, Python, Regex
**Web & Frameworks:** HTML, CSS, React.js, Redux, Node.js, Express.js, Mongoose
**Backend Concepts:** RESTful APIs, Third-Party Integrations, Webhooks, Pagination, Caching, Rate Limiting
**Databases & BaaS:** MongoDB, SQL, Appwrite
**Authentication & Security:** JWT, Sessions, Refresh Tokens, Password Hashing, OAuth 2.0
**Tools & Deployment:** Git, GitHub, Postman, Docker, Microsoft Azure, Render, Vercel
**DevOps:** CI/CD Fundamentals, Containerization, Cloud Deployment
**Core Concepts & AI Tools:** Data Structures & Algorithms (DSA), GitHub Copilot, Antigravity, v0

## Internship Experience

**System Polygon** **May 2025 – July 2025**
*Web Developer Intern* *On-site*

- Contributed to front-end fixes on a client website, including layout alignment and content updates to improve user experience.
- Developed internal learning projects, including a Data Visualization platform and a social media application, applying API integration, modular architecture, and database-driven development while collaborating with the team on code discussions and reviews.

## Projects

**DataViz — Analytics Dashboard** | *JavaScript, Chart.js, Express.js, Stripe, MongoDB*

GitHub: https://github.com/AntimonyBullets/DataViz | Live: https://datavisualisation-alpha-inky.vercel.app/

- Developed a Node.js (ESM) + Express REST backend with MongoDB/Mongoose and separate public/admin interfaces.
- Delivered Chart.js visualizations with filters, multi-country comparisons, and analytics from World Bank API + CSV ingestion pipeline.
- Implemented JWT authentication, role-based admin access, protected routes, and premium-feature access controls.
- Integrated Stripe Checkout with secure webhooks for premium upgrades and 30-day access lifecycle management.
- Established centralized error-handling utilities (ApiError/ApiResponse, async wrappers) and deployed backend on Vercel.

**ContentPilot — AI Content Creation Workflow |** *React, TypeScript, Express.js, MongoDB, LLM APIs, OAuth 2.0, Docker, Microsoft Azure*

Live: https://contentpilot-amber.vercel.app/

- Developed an AI-powered content creation workflow using TypeScript, Express.js, and MongoDB to streamline content generation.
- Integrated LLM APIs for AI-generated content, transcription services, and AI-powered image generation.
- Implemented OAuth 2.0 authentication and third-party API integrations to support authenticated workflows.
- Containerized the backend using Docker and deployed it to Azure Container Apps, configuring cloud resources and environment-based secrets.

**Social Media — Backend Project** | *Node.js, Express.js, Cloudinary, JWT, Multer, MongoDB*

GitHub: https://github.com/AntimonyBullets/Social-Media-Platform

- Designed a Node.js + Express backend with JWT auth, refresh tokens, RBAC, and secure password hashing.
- Engineered core modules for videos, tweets, likes, comments, playlists, subscriptions, and channel statistics, with pagination and optimized queries.
- Configured Cloudinary + Multer for secure media uploads and storage for images and videos.
- Modeled MongoDB schemas and built aggregation pipelines for analytics such as watch history and engagement insights.
- Standardized API responses with centralized error handling (ApiError / ApiResponse) and validated workflows using Postman.

## Education

**Bachelor of Technology in Computer Science and Engineering** **2023 – 2027**
*Jodhpur Institute of Engineering & Technology* *CGPA: 9.10*
